

# Measuring and ordering a Casement Sill Stop

## 4 Easy Measurements

First, take a close look at your existing Casement Sill. You will need to take multiple measurements to order this part. The part will be manufactured to you exact specifications and shipped to you.

**OR**

Whether your hardware opening is oriented on the left OR right, ensure you measure B, C, and D from the left to right when facing the front of the sill stop (see diagram above).

**Final check! Ensure your measurement for A equals the total measurements of B, C, and D added together ( $A = B+C+D$ ).**

Dimension A:	_____
Dimension B:	_____
Dimension C:	_____
Dimension D:	_____

Finally, specify the depth of the groove that your screen sets in. The deep groove is 5/16" while the shallow groove is 3/16". You will be asked to select which option you need when ordering.
